

**RELEASE NOTES – 11.21.2024**

**Improvements**

In the following sections, we will discuss the updates made to the POS 2.0 system, including the Digital Application and Borrower Portal. We will also cover any improvements made to third-party providers, if applicable, as well as any global updates. These updates are for both Loan Origination System (LOS) integrations. We will highlight the improvements made to the system's capabilities and user interface/experience. Each improvement will be categorized based on its unique Loan Origination System integration.

**Feature Toggle:** Represents features that need to be configured or toggled on before it is available in the application. Please contact your Account Manager to learn more.

**Global Improvements**

Issue Key	Type	Application	Summary	Feature Toggle

## Glossary

**Feature:** Represents a feature [functionality, user interface, or user experience].

**Bug Fix:** Indicates that we implemented a solution to resolve some defect in a feature [functionality, user interface, or user experience].

**Feature Toggle:** When the value for this field is “Yes”, then you need to connect with your account manager to toggle the feature/enhancement on in your application. When the value is “No”, you get this feature/enhancement/fix by default.
