

## RELEASE NOTES – 04.03.2025

### Improvements

In the following sections, we will discuss the updates made to the POS 2.0 system, including the Digital Application and Borrower Portal. We will also cover any improvements made to third-party providers, if applicable, as well as any global updates. These updates are for both Loan Origination System (LOS) integrations. We will highlight the improvements made to the system's capabilities and user interface/experience. Each improvement will be categorized based on its unique Loan Origination System integration.

**Feature Toggle:** Represents features that need to be configured or toggled on before it is available in the application. Please contact your Account Manager to learn more.

### Global Improvements

Issue Key	Type	Application	Summary	Feature Toggle
POS-3465	Feature	Borrower Portal	Display a message indicating no eligible loans are found when a borrower without any eligible loans attempts to log in	

### Encompass® by ICE Mortgage Technology®

Issue Key	Type	Application	Summary	Feature Toggle
POS-3520	Bug Fix	Borrower Portal	Borrowers cannot upload documents or access their initial disclosures	

**MeridianLink® One platform**

Issue Key	Type	Application	Summary	Feature Toggle
POS-3372	Bug Fix	Digital Application	A non-real co-borrower has been appended to the borrower's loan	
POS-3423	Bug Fix	Digital Application	The Debt Payoff PDF is no longer being mapped to the Loan Origination System	

**Glossary**

**Feature:** Represents a feature [functionality, user interface, or user experience].

**Bug Fix:** Indicates that we implemented a solution to resolve some defect in a feature [functionality, user interface, or user experience].

**Feature Toggle:** When the value for this field is “Yes”, then you need to connect with your account manager to toggle the feature/enhancement on in your application. When the value is “No”, you get this feature/enhancement/fix by default.
